Our Board of Directors

▶ Mr. Subash Chandra Tripathy

A highly learned professional with ACA, ACS, AICWA, MBA qualifications. His 20 Years of corporate experience before starting ACPL gave him the required boost and back up to fulfil his dream. He is an epitome of perseverance, dedication and hard work. He has single handedly catered to business needs for years and hopes to grow even faster each passing year.

▶ Mrs. Jyotsna Rani Tripathy

Mrs. Tripathy is a graduate and lends her invaluable experience as a operations leader every day. She is highly creative, diligent and hopes to see ACPL in the Fortune 500 companies one day.

Problems

- ▶ The construction industry faces a number of challenges and issues, including:
- ▶ **Cost Overruns and Budget Management:** One of the biggest problems in the construction industry is managing costs and ensuring that projects are completed within budget. Cost overruns can cause delays, reduce profit margins, and damage a company's reputation.
- ▶ **Schedule Delays:** Another common issue in the construction industry is delays in project schedules, which can be caused by a variety of factors, including weather, material shortages, and labor strikes.
- ▶ **Quality Control:** Ensuring that construction projects are built to a high standard of quality is a major challenge, and requires effective quality control processes and skilled workers.
- ▶ **Health and Safety:** The construction industry is one of the most dangerous industries in the world, and there is a constant need to improve health and safety practices to reduce the risk of accidents and injuries.
- ▶ **Sustainability and Environmental Concerns:** The construction industry has a significant impact on the environment, and there is a growing need for sustainable and environmentally responsible practices in all aspects of construction.
- ▶ **Skilled Labor Shortage:** The construction industry is facing a shortage of skilled workers, which can make it difficult to find the skilled labor needed to complete projects on time and within budget.
- ▶ **Innovation and Technology Adoption:** The construction industry has been slow to adopt new technologies and innovations, which can lead to inefficiencies and missed opportunities to improve processes and reduce costs.

Solutions

We are providing various solutions like as follows :

- ▶ **Cost-Effective Solutions:** By using innovative materials and processes, a construction manufacturer startup can offer cost-effective solutions that help reduce costs and increase profit margins.
- ▶ **Improved Scheduling:** By implementing advanced project management techniques and using technology to streamline processes, a construction manufacturer startup can help ensure that projects are completed on time and within budget.
- ▶ **Quality Control:** A construction manufacturer startup can focus on quality control and offer solutions that improve the overall quality of construction projects, reducing the risk of defects and increasing customer satisfaction.
- ▶ **Health and Safety:** A construction manufacturer startup can prioritize health and safety and implement innovative solutions to reduce the risk of accidents and injuries in the workplace.
- ▶ **Sustainability and Environmental Responsibility:** By incorporating sustainable materials and processes, a construction manufacturer startup can help reduce the impact of the construction industry on the environment.
